why EVO NEW

Totally enriched in detail, the WHY EVO honours the original design that attracted the success it has gathered today.
The new WHY EVO has been fitted with a double LED (one WHITE and one BLUE).
This new addition enhances the user experience by making it easier to program and use.
Importantly, Sice Tech has incorporated a proprietary Sice 64 bit rolling code on each button, which can be over written or reinstated easily. These are to match our range of Multi Frequency Receivers.

INSTRUCTIONS

Press and hold button 1 of the WHY EVO, at the same time press button 2 four times.

Release both buttons. Now the WHY EVO's WHITE LED will emit a short flash every 2 seconds.

On a flat, non-metallic surface, place the original remote control head to head with the WHY EVO, at a distance of about 5 cm.

Press and hold the button of the original remote control you wish to copy. Once a correct signal is received, the WHITE LED begins to flash rapidly. Once correct learning has been achieved, The WHITE LED will change colour to BLUE. You can now release the button of the original remote.

While the BLUE LED is flashing, select and press and hold the button on the WHY EVO that you want to store the code just learnt. Keep holding the switch until the LED turns off.

The WHY EVO may now be programmed directly to the Motor/Receiver in the same way as a genuine replacement following the units own User Instructions for the correct procedure. (See the compatibility list overleaf).

NOTES

• If the WHITE LED flashes only 3 times and switches off , the code has not been learnt correctly. Please repeat the operation from step 1.
• The WHY EVO memory is completely re-writable.
• The remaining buttons of WHY EVO can be used to copy any of the other remotes on the list in this catalogue. Please repeat the procedure from step 1 for each additional remote to be copied.
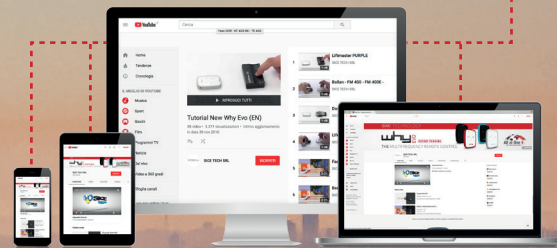

D.O.R. TECHNOLOGY

Direct On Receiver Technology is a new, patented programming process which makes menu driven programming functions a thing of the past. Popular throughout Europe, D.O.R. makes use of "Radio Mode" which is present in many remote receivers used in modern Automation. When D.O.R. is available, the remote learning procedure "knows" what to do and just does it. Automatic, hands free programming. Leave the screwdriver in the van.

COMPATIBILITY LIST

BRAND	MODEL	D.O.R.
ADYX	TE4433H BLUE, 433-HG BRAVO	DOR Technology
AIRPORT	D382, D302, D304, D313 (433 and 868MHz)	Direct Functioning
APRIMATIC	TR, TM4, TXM	DOR Technology
ATA	PTX4	Act on the Receiver
B&D	MPC2, MPC3, MPC315, MPC4, TRG306, TRV300, 062162, PTX4, 062170, 062266, 059739	Act on the Receiver
BENINCA	TO. GO. WV, TWV, ROLLKEY, APPLE, LOT WCV, CUPIDO	DOR Technology
BENINCA	IO	Act on the Receiver
BFT	MITTO, MITTO M, MITTO RCB, MITTO A, TRC, GHIBLI, MURALE, KLEIO	DOR Technology
BOSS	HT1v1, HT1v2, HT3 (Blue and Red LED versions), HT4 2211L, HT41-44, HT20, Multicode 3060, 3083, 3070, 3089, 4020, 4120	Act on the Receiver
CAME	TOP432, TOP434, TOP862 , TWIN	Direct Functioning
CARDIN	TRS S435,TRS S437 TX	Act on the Receiver
CASALI	JA33 AMIGO	Act on the Receiver
CENTURION	HT1v1, HT1v2, HT4 2211L, 4333A, 4335A	Act on the Receiver
CHAMBERLAIN	94333E/94334E/94335E, TX4 UNI	Act on the Receiver
DEA SYSTEM	PUNTO 278, GOLDR, GENIE R 273, GENIE R-GT2/GT4N 433, MIO TR	DOR Technology
DIGI-CODE	5040, 5070	Direct Functioning
DITEC	BIXLP, GOL4, BIXLG	DOR Technology
DOOR-MATE	303Mhz Range	Act on the Receiver
DYNAMIC	HT1v1, HT1v2, HT3 (Blue and Red LED versions), HT4 2211L, HT41-44, HT20	Act on the Receiver
EASYLIFTER	4333A, 4335A	Act on the Receiver
ECOSTAR	RSC, RSE, RSZ	Act on the Receiver
FAAC	TML 433SLH, XT 433 SLH, T 433 SLH	Direct Functioning
FAAC	XT4 433 RC, TE433HG	Act on the Receiver
FADINI	JUBI-SMALL, JUBI 433, SITI 433, DIVO	DOR Technology
FIRMAMATIC	059409, 4335A	Act on the Receiver
GENIUS	KILO 433 JLC	Direct Functioning
GENIUS	BRAVO, ECHO	Act on the Receiver
GIBIDI	AU1600, AU1600 WOOD, AU1680, AU1680 WOOD, DOMINO	DOR Technology
GRIFCO	CG844	Act on the Receiver
GUARDIAN	HT1v1, HT1v2, HT3 (Blue and Red LED versions), HT4 2211L, HT41-44, HT20	Act on the Receiver
HOMENTRY	433, HE60R	Act on the Receiver
KEY	900TXB-42R, TXB 44R, SUB 44 R	Act on the Receiver
KING GATES	Clipper, Stylo	Act on the Receiver
LETRON	AR1	Act on the Receiver
LIFT MASTER	94333E, 94335E	Act on the Receiver
LINEAR	Linear, Megacode, Linear Multicode 3060, 3083, 3070, 3089, 4020, 4120	Direct Functioning
LYNX	HT4 2211L	Act on the Receiver
MAGIC BUTTON	PTX4, 304MHz (Older Types)	Act on the Receiver
MARANTEC	D382, D302, D304, D313 (433 and 868MHz)	Direct Functioning
MERLIN	C945, C940, C943, CM842, CM844, M832, M842, M844	Act on the Receiver
MHOUSE	TX3, TX4, GTX4	DOR Technology
MODERN	C945, CM842, CM844, C940, C943, CM128, M832, M842, M844	Act on the Receiver
MOOVO	MT4G	DOR Technology
MOTOR LIFT	4333, 4335	Act on the Receiver
NICE	SMILO, FLOR-S, VERY-VR, FLOR-S ERA	DOR Technology
NICE	ONE (ON), ON ERA, INTI, ERGO, PLANO	Direct Functioning / DOR Technology
O&O	TX, T.COM R4-2, TWIN	Act on the Receiver
PRASTEL	MTE, MPSTLE, MPSTP2E, TCE, BFOR, TRQ-P	DOR Technology
PRO LIFT	C945, CM842, CM844, C940, C943, CM128, M832, M842, M844	Act on the Receiver
RIB	MOON, SUN	Direct Functioning
RIB	LITHIO	Act on the Receiver
STEEL-LINE	HT1v1, HT1v2, HT3 (Blue and Red LED versions), HT4 2211L, HT41-44, HT20, Multicode 3060, 3083, 3070, 3089, 4020, 4120	Act on the Receiver
TAU	250 -K SLIM R, T4RP	Act on the Receiver
TELCOMA	NOIRE, NOIRE 2E	Act on the Receiver
TILT-A-MATIC	TRG and TRV Range	Direct Functioning
