

4G GSM GATE OPENER

The G4000 combines 4G connectivity with advanced technology for simple, secure access in residential and commercial settings. Designed in Australia with a Canadian 4G module, it only requires an active SIM card and user phone numbers to operate. With the Elsema Mobile App (iOS & Android), you can set up, manage users, grant or revoke access and receive real-time notifications—all from your smartphone.

FEATURES

- Up to 2000 users
